The requirements and benefits of the investment offer

Scope

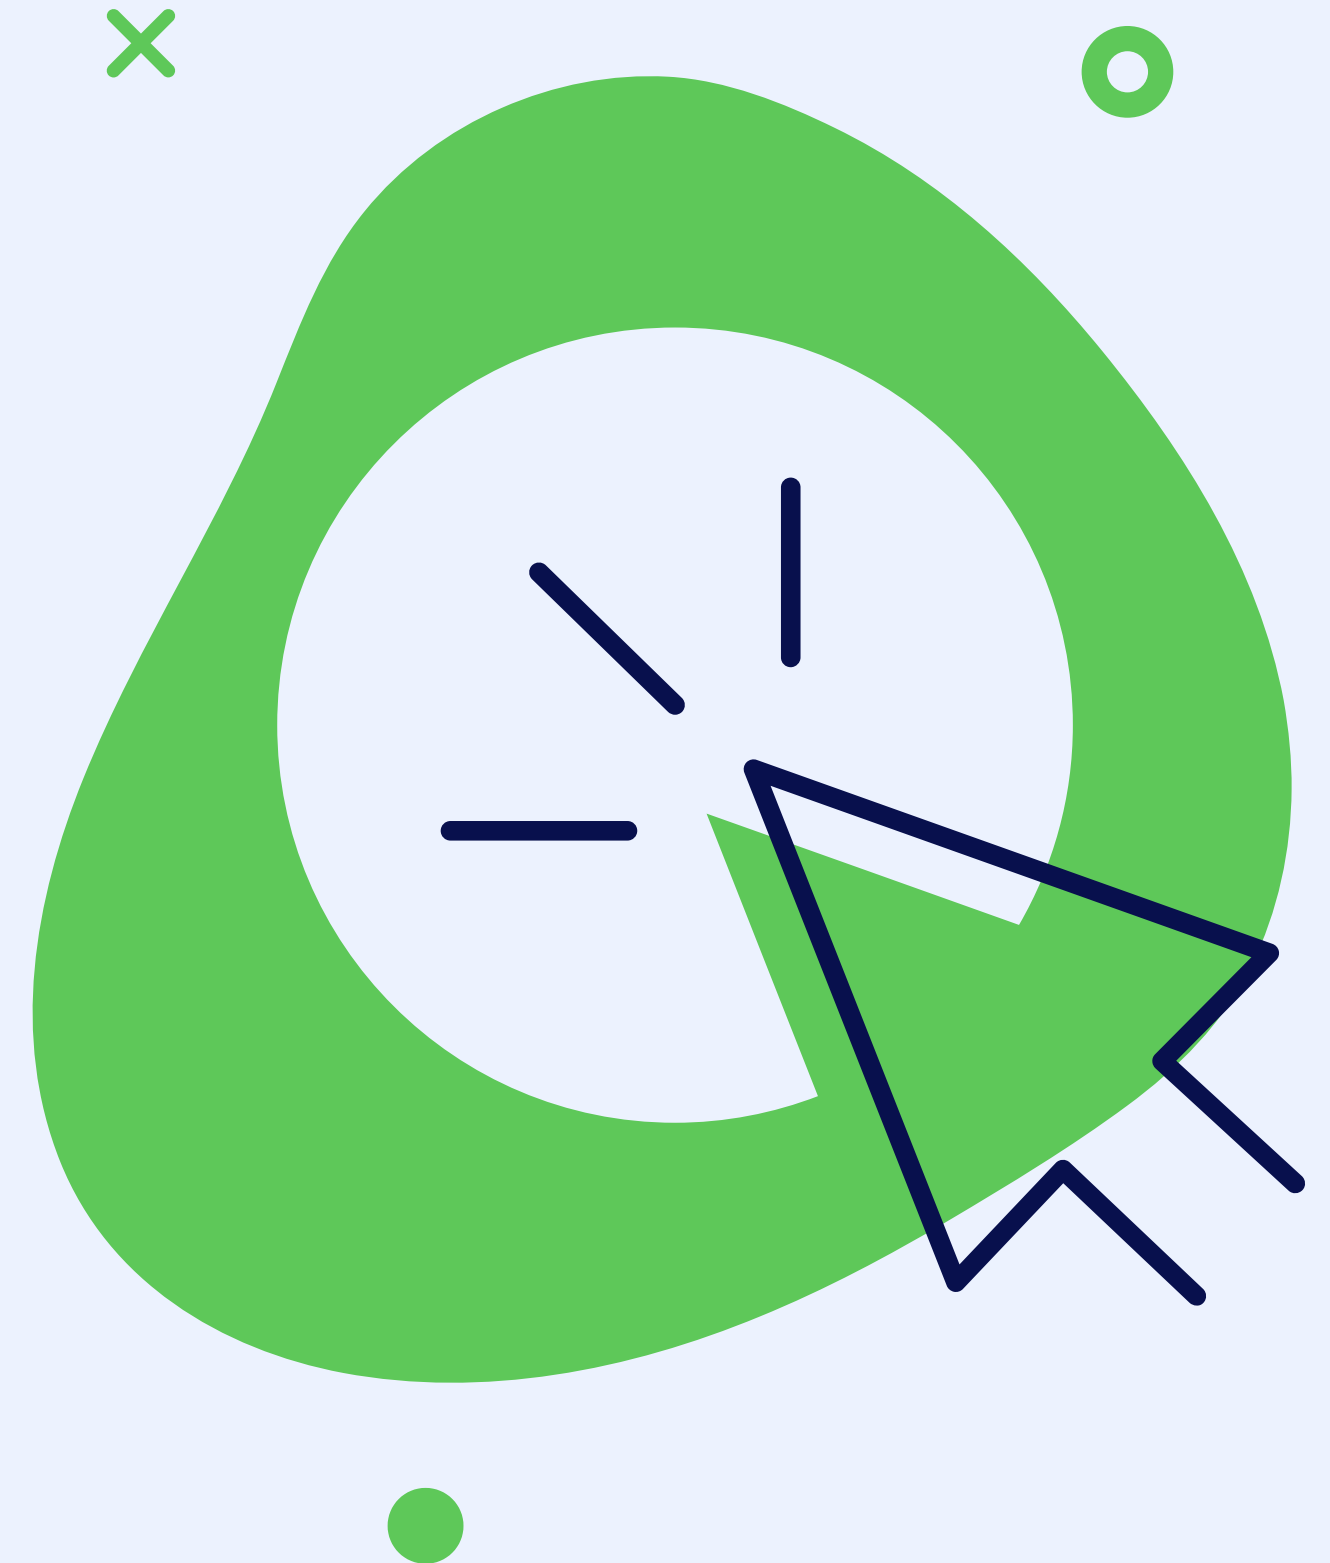

This presentation is about the HFT business investment program

Overview

The Business Investment Plan (BIP) is specially designed for businesses who are looking to expand their capital base, embrace the financial technology edge of cryptocurrencies, and increase their business revenue streams.

High Frequency Technology pioneered this program as part of its digital assets management services, so that businesses can break off the limits on financial restrictions, and access the global financial ecosystem of cryptocurrencies.

Arbitraging

The actual product offered in this program is the crypto arbitraging, which allows the HFT technology to rapidly make arbitrage trades across multiple crypto exchanges around the world, and profit from their differences in price. What this means for investors is that their crypto assets can go around the world and return with increase in quantity.

Benefits of the BIP

The Business Investment Plan has inherent benefits, and of course, other benefits coming from HFT

The BIP is a secure and proven method for business owners to convert their capital to direct assets, while retaining high liquidity and portability.

The BIP is an unrestricted way for businesses to increase their revenue opportunities, because it serves also as an investment for the entity.

The BIP helps businesses access the financial technology leverage which cryptocurrencies offer to participants.

Investors are required to be business owners

Minimum investment is \$50,000, but the recommended investment capital is \$200,000

The maximum investment capital for a single business under this program is \$12 million

Investors are required to own bitcoin in order to join

Requirement

To participate in this program, the investor is required to be a business owner or an institutional investor. The minimum entry capital for this program is \$50,000 (USD), and is deposited in bitcoin to ensure high security and avoid unnecessary banking charges

Pricing Structure

This program is exclusive for business owners and is not openly listed. Hence, it comes with a special pricing structure that helps investors break down the whole amount into instalments while maintaining the profit percentage of the plan, rather than the initial investment size.

Call to Action

The time to act is now, because each passing day, the value of the cryptocurrency assets increase, making it more expensive to access.
We invite you to take action without further delay.

To begin, get back to the person who shared this document with you,
to guide you on your onboarding process right away.
Join today, and be among those who get to share in the early adopter's
benefits.
